

One Account. Countless Possibilities.

Maestro's partnership with iaTS gives you access to all of iaTS' powerful merchant services. Our qCheck "quick checkout" solution leads the event payment industry with a easy, secure, and cost-effective solution.

### iaTS Account Rates

3.30%

3.70%

**Accounts issued by iaTS are subject to iaTS account fees:** \$250 annual fee, \$5/mo regulatory fee, and \$125 annual PCI compliance (PCI fee is waived if you already hold a PCI certificate)

### Accept credit cards at EVENTS

qCheck is built into AuctionMaestro Pro, and can accept and store credit cards before and during the event. qCheck is designed to allow you to simply "capture" cards at your event, and then batch process later after you've had time to check your numbers.

### Accept credit cards ONLINE

qCheck is built into MaestroWeb for online RSVP forms that allow your guests to pre-register their cards. qCheck AURA allows you to build in a year-round one-time or recurring donation page into your existing website.

### Accept credit cards YEAR ROUND

When not used at events or online, qCheck software acts in "Cash Register" mode, allowing you to process cards in real-time like a traditional credit card terminal.

### All of the features with none of the hassle:

- qCheck doesn't require an internet connection or phone line at events
- qCheck uses USB credit card readers (pictured below), which we loan to you free of charge
- Most processed charges are directly deposited into your bank account in 1-2 days
- Hand-entered cards process for no additional fee (common when accepting via phone)
